DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11, drawn to a mass transfer system, classified in class 261, subclass 20.
- II. Claim 18, drawn to a mass transfer apparatus, classified in class 261, subclass 24.
- III. Claim 20, drawn to a hemodialysis apparatus, classified in class 210, subclass 646.
- IV. Claim 22, drawn to an apparatus for liver assist, classified in class 604, subclass 4.01.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are either used for specific functions which are different, such as hemodialysis, blood oxygenation or liver assist as in III or IV, or the system is broadly claimed and can be used for chemical or water treatment as in group I. These inventions are in separate classes or have separate functions within a class and require a separate search.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Response to Preliminary Amendment

It is noted that claims 12-17, 19 & 20 have been cancelled in the amendment filed 4/19/04. Claims 1-11, 18, 20 & 22 remain pending.
